Overview Of Global Online Food Delivery Market

Global Online Food Delivery market by value is expected to grow significantly during the forecast period with a CAGR of xx%.

Based on Business Model, Order Focused Delivery System Segment is expected to grow significantly owing to the rise in expansion of business and industries, at both local and regional level.

The global Online Food Delivery market was valued at USD xx Billion in 2020.

An increase in smartphone users has given a boost to online food delivery services worldwide. Smartphone users are the primary online shoppers for the F&B industry and an increase in the number of smartphone users reflects a potential increase in online shopping for food and beverages.

The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges.

North America region holds the major Online Food Delivery market share of around xx% in 2020. APAC will offer major growth opportunities to market players during the forecast period.
